Profile Summary

AI & Machine Learning diploma student with a strong foundation in logical problem-solving, rapid prototyping, and collaborative development. I turn AI concepts into production-ready full-stack solutions.

Education

Diploma in Artificial Intelligence & Machine Learning
S.H. Jondhale Polytechnic, Dombivli | 2024 - Present
Current: 2nd Year • 72% aggregate

Core Skills

Java, JavaScript, Python, C, HTML5, CSS3, Spring Boot, Next.js, React, Node.js, JWT Auth, REST APIs, Integration Testing, ML Concepts, Algorithmic Thinking

Featured Projects

Jarvis AI Engine

High-throughput AI engine built for fast token generation and efficient inferencing across large parameter counts.

AI Content PRO Platform

Full-stack platform with Spring Boot backend and Next.js frontend, featuring JWT authentication and performance-first UI design.

InfiniCode Ecosystem

Platform focused on backend reliability, environment scalability, and team-friendly workflows.

Console Checkers Engine

Command-line game engine in C with board tracking, move validation, and optimized decision flow.

GitHub Repositories

rocketride-server â€” AI pipeline engine with C++ core and Python integration.

ai-llm- â€” Vercel deployment project for AI frontend applications.

base-sepolia- â€” Blockchain and Ethereum tooling work.

college-pro â€” Academic and college project work.

Jrvis â€” AI automation and tooling experiment.

tech-spur â€” AWS and cloud-focused development work.

Goals

Advance UI/UX design, cloud deployment, scalable microservices, and advanced neural networks.
